

# RapidStart

Fast-track your move to the Cloud with iAppSys

## Accelerate your journey to the cloud.

**The iAppSys RapidStart program is a complete cloud life-cycle management solution.**

**Accelerate your migration to the cloud, reduce risk, and monetize your cloud investment.**

### **iAppSys RapidStart Solutions**

Getting your Enterprise Cloud Infrastructure off to the right start is critical to achieving your business goals and reducing unnecessary risk. Self-service provisioning, performance and resource management are key features of Oracle Enterprise Manager that help drive your successful cloud implementations. Understanding how Oracle Enterprise Manager can help you automate complex management tasks across the complete cloud lifecycle is critical to enabling your business users and meeting their IT needs.

- ⚡ Expert assessment of your cloud roadmap by iAppSys with your business and IT teams.
- ⚡ Expert installation of Oracle Enterprise Manager and cloud management packs
- ⚡ Demonstration to your team to define cloud features and components, and provide guidance on management strategies specific to your environment.
- ⚡ Maintain complete visibility of physical and virtual environments from applications to disk at all times.
